

# HYDROCULTURE

## *What is Hydroculture?*

*It is the science of growing plants without soil.*

*It's clean, no standing water, so less chance of mosquitoes breeding, & soil borne diseases.*

*Plants are grown in an Expanded Clay, which is completely natural. Ensures an optimum air/water/fertilizer ratio for healthier plants.*

*Retains fertilizers longer.  
Less maintenance.  
Long lasting joy.*

**SIMPLY MORE THAN LEAF AND FLOWER**

## Watering the plants

**1.**

Add water  
until  
the  
indicator  
shows

**2.**

Let the  
water level  
drop  
>>min.<<

**3.**

Then fill  
water up to  
the  
>>opt.<<  
mark again

If you are away for some time you can fill up to  
the >>max.<< mark.

# WITH PUSHPAM HYDRO-CULTURE

## IT'S EASY, CLEAN AND COMFORTABLE

### Plants

Especially cultivated for hydro-culture in clay pebbles.

### Water level indicator

Shows when to water plant and how much water is needed.

### Decorative Containers

Are guaranteed watertight in many shapes and colours.

### Clay Pebbles

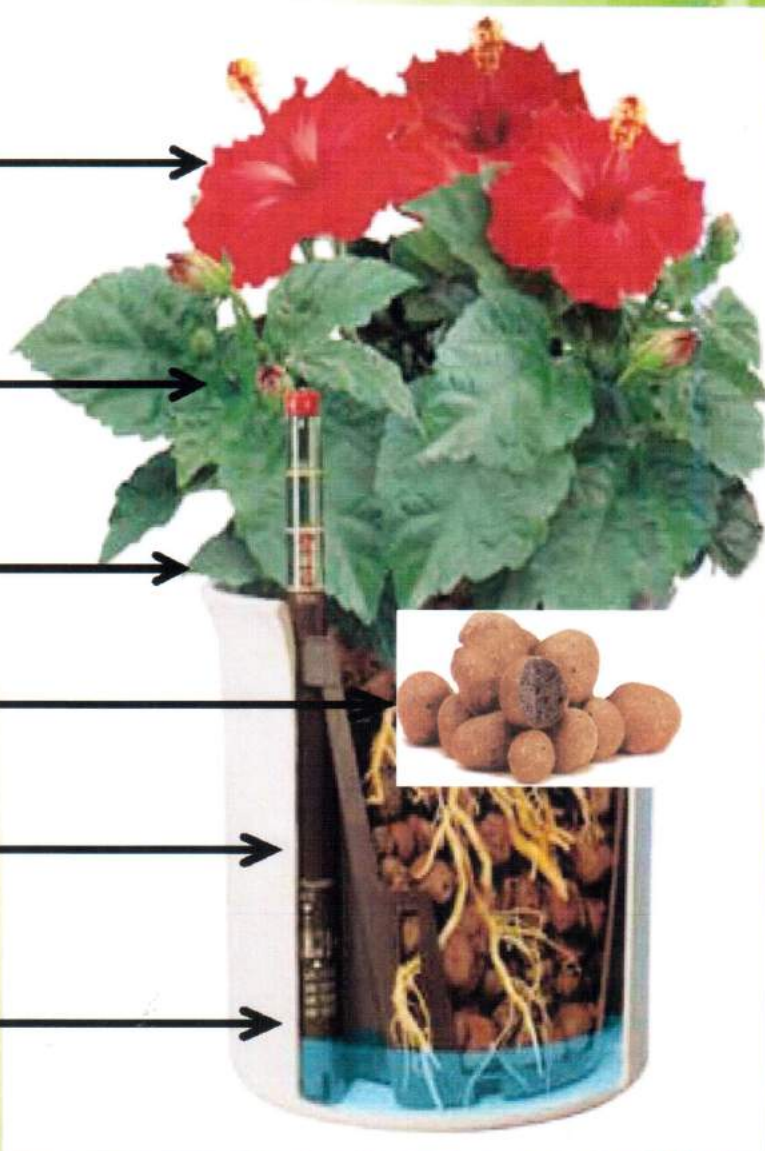

An ideal growth medium that ensures good root.

### Culture-pot

Designed to hold the plant, water level indicator and nutrient battery.

### Water reservoir

Allows longer periods between watering.
